

Learning in the 21st Century: Technology-Enhanced Learning and European Research

PATRICIA MANSON

Head of Unit, Cultural Heritage and Technology Enhanced Learning

Directorate General Information Society and Media of the European Commission Electrical Engineering Department

Keywords: *Technology, Research, Learning*

The presented communication explores the challenges facing learning in the 21st century and describe the role of European research in technology enhanced learning in this changing context. Experience has revealed the importance of giving equal weight to the technologies, to the learning and to the improvements in learning and this balance is at the core of technology-enhanced learning.
